PROFESSIONAL SUMMARY

Full-stack software engineer with a Bachelor of Arts in Computer Science from Florida International University and hands-on experience building and deploying production applications, including an AI-powered analytics platform with real beta users and a custom storefront and inventory management system for a live retail business. Proficient in React, TypeScript, Node.js, and SQL, with experience integrating REST APIs and LLM APIs into practical software products. Seeking to bring strong engineering fundamentals and end-to-end ownership to an early-career full-stack software engineering role.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, C

Frameworks & Libraries: React, Next.js, Node.js, Spring Boot, Tailwind CSS, HTML/CSS

Databases & ORM: PostgreSQL, Supabase, Prisma ORM

Cloud & DevOps: Vercel, Render, GitHub Actions (CI), Docker, Git/GitHub

Tools: Postman, Vite, IntelliJ, Visual Studio Code

PROJECTS

Expense IO: AI Expense Analytics Dashboard

January 2026 – Present

React, TypeScript, Vite, Supabase, Tailwind CSS | expense-iq-lilac.vercel.app

- Designed and shipped a production AI-powered expense dashboard serving 6–10 active beta users; frontend deployed on Vercel, backend API on Render, with GitHub Actions CI on every push.
- Implemented AI-assisted merchant categorization using Claude API (claude-haiku-4-5) to auto suggest expense categories, paired with a rule-based insights engine that flags budget status (on track/ near limit / over budget) per category.
- Reduced re-render cycles by ~35% through modular component architecture, improving UI responsiveness and interaction speed.
- Designed and implemented a RESTful backend with optimized PostgreSQL queries, cutting average data retrieval time by 40%.

StoreLens: Multi-Client Retail Admin System

February 2026 – August 2026

Next.js, React, TypeScript, Tailwind CSS | classicismenswear.org

- Designed and deployed a mobile-first storefront with inquiry and reservation functionality for a menswear retail business, replacing an outdated web presence with a modern, responsive site.
- Built StoreLens, a reusable admin system for inventory, product, and storefront management, now deployed across two clients (Classic Menswear Inc and Redgine Creates LLC), replacing manual, spreadsheet-based tracking.
- Delivered end-to-end as a solo engineer: architecture, frontend, admin tooling, and deployment on Vercel.

Kairos Collaborative Time Management Application

Sep 2025 – Dec 2025

React, Node.js, SQL, GitHub Collaboration | github.com/Kairos-Moment/kairos-app

- Built a full-stack task management app with a 3-person team using React and Node.js, delivering a working product within a single semester.
- Integrated a REST API with task persistence, reducing frontend state sync issues during collaborative sessions.
- Led GitHub collaboration workflows, managed branching strategy, reviewed 15+ PRs, and enforced code review standards.

EXPERIENCE

Auralith Systems

Miami, Florida

Founder & Software Engineer

Dec 2025 – Present

- Founded a software consultancy delivering full-stack engineering solutions for small businesses, owning the full engineering lifecycle, architecture, frontend, backend, admin tooling, and deployment as a sole engineer.
- Independently designed, built, and deployed a client storefront with inquiry/reservation functionality and StoreLens, a custom admin dashboard tailored for inventory, product, and storefront management, for retail client Classic Menswear Inc, replacing their manual tracking processes.

Classic Menswear Inc

Miami, Florida

Sales Associate / Floor Lead

Dec 2019 – Present

- Managed high-volume customer interactions in a fast-paced retail environment, consistently recognized among top associates for customer satisfaction.
- Streamlined floor operations during high-traffic hours, contributing to measurable reductions in customer wait times and improved throughput.
- Onboarded and trained 5+ new employees on POS systems and procedures, cutting ramp-up time by ~30%.

EDUCATION

Florida International University

Miami, Florida

Bachelor of Arts, Computer Science | Minor: Entrepreneurship

January 2022 – August 2026

Relevant Coursework: Data Structures & Algorithms, Systems Programming, Operating Systems Principles, Database Systems, Software Engineering I, Software Engineering II

ACTIVITIES AND LEADERSHIP

CodePath Emerging Engineer Empowerment Program

Miami, Florida

Student/Participant

Sep 2024 – Present

- Completed intensive, hands-on training in full-stack web development, applying Agile practices, Git version control, and peer code review on team-based projects, including the Kairos capstone.
- Applied full-stack development skills in a team-based capstone project (Kairos), building and deploying a collaborative task management app.
